RANDOM REFERENCES

(Continued From Page Five.)

Made a Citizen—In Judge Howell's court this morning Virfilio Lobello of this city was admitted to citizenship. Mr. Lobello is a native of Italy but he has resided in this country many years, spending a major portion of the time in Ogden.

Assistant Superintendent Thomas Fitzgerald of the Southern Pacific who has been in ill health for some time past leaves with his family to-day for California where it is hoped the warmer climate will benefit him.

In Police Court—Pat Kelly and Thomas O'Keefe, charged with disturbing the peace, were arraigned in police court this morning and pleaded guilty to the charge. They were fined each, in default of which they were locked up in the city jail for five days.

You can always depend upon B & G Butter being of extra fine quality. Use it once, and you will use no other.

Marriage Licenses—Marriage licenses have been issued to Isaac Hunt of Pine, Arizona, and Florence Poulter of Ogden; John W. Lewis of Evanston, Wyo., and May Lee of St. Louis, Mo.; and to Simon M. Layton of Clearfield and Anna D. Fife of Riverdale.

D. B. Mains, forest supervisor of the Payette national forest, Idaho, is in Ogden for four weeks' detail work at headquarters of the forest service.

ALL Elks Excursion—Many Elks of the local organization are preparing to make the trip to Los Angeles February 3, at which time the Salt Lake Elks will make their seventh annual pilgrimage. Dan Eason of the Arlington has charge of the ticket and of the Ogden department, and he states that over fifty reservations for places in Pullman cars have been booked.

Supervisor C. G. Smith of the Cache national forest has returned to his home at Logan after having spent a number of weeks in this city doing forest detail work.

Foreclosure—Judge Howell today rendered a decision foreclosing a certain mortgage held by John F. Ahern against Charles Masco and V. L. Lafferty on certain store fixtures and the sheriff was ordered to sell the property. The judgment was for \$456.75 and the costs of suit.

E. S. Rolapp of the Amalgamated Sugar company leaves this afternoon for San Francisco on a business trip.

M. Tell, the man arrested last night as a vagrant and, when taken to the police station, found to be suffering from smallpox, was removed to the city pest house this morning. His case is reported as serious, though there is a fair chance for his recovery.

Gus Trolight, proprietor of the pool room under the Reed hotel, who arrested this morning charged with allowing minors to frequent his place. The case will be heard in police court tomorrow morning.

Judgments—The following judgments were rendered in the municipal court yesterday: Frank Smith vs. E. Hodson for \$70; Dr. Joseph Morrell vs. C. Wayment for \$108; William Sewell vs. Mrs. W. H. Starbuck for \$25.85; William Sewell vs. F. Poulter for \$8.80.

CAN SLEEP IN CHURCH

Preacher Welcomes Men Who Cannot Keep Awake

Cambridge, Mass., Jan. 16.—Sleeping men will find they are welcome in the Union Congregational church here, according to the pastor's announcement. Dr. Stockdale heard recently that many men were unwilling to attend church services because of the fear that they will disgrace themselves by going to sleep. This is his reply:

"Let them come here. They may go to sleep if they want to. They will not worry me at all; on the other hand, sleepers often cause me pleasure. The sleeping man can't find anything to complain about in my sermon or write indignant letters to me afterward. There are many reasons why men go to sleep. Many of them have been hustling during the week and, when they come into a warm church and restful pews, they can't avoid sleeping. Heavy air and heavy sermons are also responsible. The music is soothing too. Let the men fall asleep. The rest will do him as much good as the sermon, perhaps."

TRANSFERS OF REAL ESTATE

The following real estate transfers have been made:

L. M. Hees to George Holt, lots 29 and 40, block 1, Central Park addition, Ogden survey. Consideration \$550.

H. M. Barrows and wife to Halver G. Coulter, a part of lot 3, block 29, plat C, Ogden survey. Consideration \$500.

William B. Murdoch to Harriet Barrows, a part of lot 3, block 29, plat C, Ogden survey. Consideration \$450.

ANNUAL WOOL REVIEW.

Last January, for the first time since 1903, the country showed a decrease in the number of sheep which were shorn for the wool clip. This January shows an increase over last year's figures of 81,598 sheep. The total weight of fleece produced in 1910, according to census return, was 289,419,977 pounds, and the total pounds for 1911 are 276,394,963.

During the first half of the year the wool market continued to decline. Manufacturers lacked confidence, and purchasers, who usually bought several hundred pounds at a time, were continually in the market picking up a few bales here and a few thousand pounds there. After July, the market grew firmer, and prices on many grades of wool were advanced.

There is little wool on hand in the wool-growing states, the entire supply being more nearly exhausted with two or three slight exceptions than it was last year. In 1910, buyers were not disposed to clean up stocks at the prices which holders were asking, and while some are still holding considerable Ohio, Michigan and California wool, dealers have cleaned up the country pretty well.

Pulled wools have been in constant demand, although the first part of the year shows a decline in the market on these as well as on all others. Foreign wools have continued too high to interest American manufacturers in general, and mills which are obliged to use foreign wool have their own men in the foreign market, so that the stock which is passed through local dealers is small. Prices at the foreign wool centers have been kept firm, and this is due to primary trading. The stock of wool on hand in the Boston market January 1, 1912, was 62,820,122 pounds of domestic and 7,059,817 pounds of foreign, a total of 69,879,940 pounds. These figures are official, having been furnished by the Boston Wool Trade association—Wool and Cotton Reporter.

ABDICATION PUBLISHED

Empress Dowager and Emperor Willing to Retire

San Francisco, Jan. 16.—A cable message from Shanghai, received today by the Chung Shai Yat Po, a Chinese newspaper of this city, states that news had reached there from Peking that a proclamation of abdication was published by the throne today. The message further stated that the empress dowager announced their willingness to retire to the summer palace at Je Hol.

SECRET SUGAR TRUST HEARINGS

Washington, Jan. 16.—The house "sugar trust" investigating committee today decided to shut off all further public hearings except to W. L. Bass, a San Domingo sugar grower, the Wisconsin beet sugar factories and the Hawaiian sugar plantations. The independent refinery protested in vain against the action.

CHINA, POTTERY AND BRICK MAKING.

Clay products of the United States last year aggregated \$170,115,974 in value, an increase of \$3,794,761 over the previous year. In this line of goods there is comparatively little foreign trade. Of fire brick, for example, the output in 1910 totaled 922,209,000, valued at \$18,111,474, but the exports thereof reached only \$624,775, or less than 4 per cent. The export of all other bricks aggregated \$965,138. However, this export trade in bricks has been growing, especially since a number of factories have located on tidewater, whence shipments are made direct by vessel. The total export sales of bricks last year were \$453,021 greater than in 1909, and \$329,427 greater than in 1908.

The most prominent recent improvement in this industry noted by the Geological Survey is the brick-setting machine introduced in the west. The idea of handling brick by machinery originated in New England, and a plant was equipped several years ago with an elaborate system and was the first to use the "unit stack." By this system the unit for handling was 1500 bricks. This plant was destroyed by fire and was never rebuilt. In 1909 a system of handling from 600 to 1000 bricks on a somewhat different plan was put into successful operation in the west, and is now being used in Chicago. By this system it is possible for the bricks to be carried from the molding machine to the drier, from the drier to the kiln, and from the kiln to the stock yard or the delivery car or cart without being touched by hand. Each of these machines is said to do the work of forty men.

The pottery was made in the United States last year had a value of \$33,784,678. Of this there was exported \$928,475 worth of earthen and stone ware, and \$11,214 of china ware. The production in 1909 was \$31,049,441 in value, and the exports \$176,842 of earthen ware and stone ware, and \$86,853 of china ware. The importation of undecorated china ware in 1910 aggregated \$1,181,232, of decorated china ware \$9,556,297, and of all other \$551,927.

A PERTINENT QUESTION.

There are great men who cannot spell, and small people who object to them. "Spell cat," said the teacher to the boy at the tail end of the class. "K-a-t," replied the boy. "Silly," replied the teacher. "Can't you spell cat?" "Well," replied the sensible boy, "what does k-a-t spell?"—London Chronicle.

BURSTING OF A FURNACE

Many Men Are Buried in a Flow of Molten Metal

Duisberg, Germany, Jan. 16.—Eight iron workers were killed and two others seriously injured by the bursting of a blast furnace near here today.

It is feared a number of victims are embedded in the metal which flowed in a great molten mass out of the molds when the furnace burst.

The workmen were paralyzed with terror when they saw the metal rapidly flowing towards them and they made no attempt to escape.

Eleven more men have been reported as seriously injured.

"HOW TOMMY SAVED HIS FATHER"—EXCELLENT VITAGRAPH—ISIS TONIGHT.

RIO GRANDE BECOMING ACTIVE

The Rio Grande railroad is contemplating extending its line along its line between Denver and Ogden and it is reported that the new policy will affect this city to a considerable extent. It is proposed to build a modern depot on the property bought a number of years ago, located on Twenty-fourth street, between Lincoln and Wall avenues.

Improvement work, it is expected, will start in the spring as soon as the weather conditions are settled and it is likely that ground for the new Rio Grande terminal will be broken within the next few months.

Several years ago a bond issue of fifteen millions was authorized by the Rio Grande and at that time only four millions was used. Arrangements have been made with Wall street bankers to dispose of the remaining eleven millions and the proceeds will be devoted to improving the road.

A new Rio Grande depot in Ogden has been needed for years and now that it has finally been decided to build on there is no doubt that a handsome structure will be erected. The property owned by the company is valued at nearly a hundred thousand dollars and affords ample space for building purposes.

The proposed Rio Grande-Bamberger alliance between this city and Salt Lake, which was mentioned in this paper as likely to take place, has according to local officials been called off and it seems safe to conclude that with the building of the new station, the Rio Grande has decided to handle all its own business between Salt Lake and Ogden.

TALC A USEFUL MINERAL.

Talcum powder is made from the soapstone some grades of which are produced in Ogden—California, Georgia, Maryland, Massachusetts, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, Vermont and Virginia. New York's output of 71,710 tons forms nearly half of the total production of the country.

Talc is usually marketed as rough from the mine, sawed into slabs and made up into manufactured objects such as laundry tubs or ground into powder. In 1910 69 per cent of the talc was ground and 21 per cent made into slabs and manufactured. The product of New York is practically all ground.

Most of the ground talc is used in the manufacture of paper of various kinds, especially building paper, says Health Culture. It finds application also in the manufacture of molded rubber forms and in various facings and paints. It readily absorbs grease, and is used to remove spots from silk and to bleach cotton goods.

On account of its slipperiness it is widely used to lessen friction, and for this purpose it is dusted into gloves and shoes, and blown into conduits to ease the introduction of electric wires or other conductors. One of its widest applications is in toilet powders, most of which are made from high grade talc imported from Europe.

Laundry tubs, griddles, foot warmers and many other similar utensils are manufactured from soapstone. The higher grades of massive talc, free from flaws, are sawed up to make pencils or crayons, French chalk, gas tips and other special articles.

ELECTROCUTING INSECTS.

Electricity as an agent to destroy the codling moth is described in the Electrical Review and Western Electrician (Chicago) as the latest innovation of modern apple orcharding in the Spokane valley, where W. M. Frost, inventor of the device, and J. C. Lawrence, a practical grower of Spokane, are making a demonstration.

The apparatus consists of a storage battery to operate incandescent lamps of six-candlepower in globes, which are netted with fine steel wires. Attracted by the bright light in the trees, to which the globe is strung, the moths alight on the globe and are instantly killed, the body dropping into a receptacle beneath as globe. Frost thinks that one apparatus to the acre of trees will keep the moths under control, thus eliminating sprays and saving many dollars for equipment and labor. If central station service is extended to the orchard tracts, as they are in the Spokane valley, the expense of batteries may be saved by making a direct connection and using the commercial current. The cost of covering the globes with wire nets is a small item.

RESCUED BY A COMRADE

Three Men Are Buried by an Avalanche in California

San Bernardino, Cal., Jan. 16.—Percy Hayward, James Alder and George Sumner, government engineers, arrived here today showing the effects of a terrifying experience in an avalanche that buried them deep in a gorge of Mount San Bernardino. The three men were saved by Harry Cummings, fourth member of the surveying party, who tunneled into the snow and rescued his buried companions.

The engineers were running survey lines about Mount San Bernardino, just beneath the snow line, when the avalanche tumbled down upon them. Hayward was hit first and was hurled into the gorge. Alder and Sumner leaped to the rescue and they also disappeared. Cummings, who was protected by a crag, went to work and dragged all three to safety.

Hayward was hit first and was hurled into the gorge. Alder and Sumner leaped to the rescue and they also disappeared. Cummings, who was protected by a crag, went to work and dragged all three to safety.

MARIE VELLINGA GRANTED DIVORCE

In the case of Marie C. Vellinga against Martin J. Vellinga, an interlocutory decree of divorce was granted today by Judge Howell.

The parties were married in Ogden, April 12, 1904, since which time the defendant, it was alleged, had treated the plaintiff in a cruel and unjust manner. He had failed to furnish her proper medical aid when she was ill and compelled her to do housework when she was hardly able to stand on her feet.

The plaintiff was awarded the custody of the two minor children, the community real estate, \$25 a month alimony, attorney fees and the cost of the suit.

AFFECTIONS ALIENATED

Wife Sues Young Heir-ess For Winning Husband's Love

Louisville, Jan. 16.—Her twenty-first birthday anniversary was made memorable for Miss Nettie Bryant Ott, heiress and grand-daughter of the late Samuel Bryant, noted as a race horse owner, by a suit filed against her here today by Mrs. Josephine Surman-Hubbard, who asks for \$50,000 for alienation of her husband's affections. The man in the case is Joseph Mackling Hubbard, a horse man.

Mrs. Hubbard alleges that her husband frequently and has been seduced by Miss Ott, who has destroyed the peace and happiness of the Hubbard household.

But the defendant declares that it is only their mutual love for horses that forms the basis of their friendship and they have been together only at horse shows.

THEY ARE TO BE EXECUTED

Throwers of Bomb Will Be Summarily Dealt With

Peking, Jan. 16.—The bomb, which was thrown at Premier Yuan Shi Kai's carriage while he was on his way to the Imperial court this morning and which killed two soldiers, injured seventeen other persons.

The men who attempted to take Yuan Shi Kai's life hoped to escape by mixing with the crowds which thronged the streets at the time. They were, however, captured.

The public executioner was at once called and with his assistants is now standing sentry in front of the house in which the would-be assassins are confined. He will remain on duty there until he receives orders from the imperial authorities, who, it is expected, will command that the men be executed immediately.

NOTICE OF FIRST MEETING OF CREDITORS.

In the District Court of the United States for the District of Utah, in Bankruptcy, Before S. T. Corn, Referee.

In the matter of William Kenley, Bankrupt, in Bankruptcy No. 1382.

To the Creditors of William Kenley of Ogden City, in the County of Weber, and District aforesaid, a bankrupt.

Notice is hereby given that on the eighth day of January, A. D. 1912, the said William Kenley was duly adjudicated bankrupt, and that the FIRST MEETING OF HIS CREDITORS will be held at my office at Rooms 309-310 of Ogden City Building, Ogden City, Utah, on the 10th day of January, A. D. 1912, at 10:30 o'clock in the forenoon, at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

Ogden, Utah, January 16th, 1912.
S. T. CORN, Referee in Bankruptcy.

CHILDREN ARE SOLD

Terrible Condition of the Peasantry in Russia

London, Jan. 16.—The terrible conditions prevailing among the peasantry in southeastern Russia are depicted in a telegram from a doctor in Orenburg, which is published here as a special article. The doctor says that the starving peasantry in the government of Orenburg, on the River Ural, owing to not having received any assistance from the authorities, are selling their children to the Khirgese nomads in the government of Saratov.

Many of the people in the vicinity have died from hunger and typhus and more than 70 per cent of the children are stricken with a fearful epidemic in some of the villages, while in other districts the distress is extreme.

"A CHILD OF THE WEST," BEAUTIFUL CHILD STORY OF THE WEST, ESSANAY—ORACLE, TONIGHT

WOULD ESTABLISH A FACTORY HERE

C. E. Peterson reports that he met a number of carriage manufacturers, while in Nebraska, one of whom indicated very strongly that he desired to move his plant west. The carriage man stated that he had been approached by parties from Salt Lake and had about decided to locate there, but Mr. Peterson represented to him so strongly the advantages of Ogden that he believes the carriage manufacturer could be induced to locate his factory in this city were the right kind of inducements offered.

Mr. Peterson said he did not care to state for publication just what these inducements were, but said he was in possession of full information and would be glad to take the matter up with interested parties at any time.

MANY RINKS ENTERED IN ANNUAL CURLING TOURNAMENT

DULUTH, Minn., Jan. 15.—With 56 rinks entered for play in the nineteenth biennial of the Northwest Curling association, the curling that is now under way promises to eclipse all previous events. The ice is in ideal condition and the weather perfect for curling. Play today in the first draw in the Duluth trophy brought out Duluth and Superior curlers.

EXPORTS OF COAL GROWING.

The people of the United States are not fully aware of the value of their great coal deposits as an article of export. Since 1900 the exports of coal from this country have increased threefold, and in 1910 reached a value of \$80,000,000, a gain over last year of \$15,000,000, or 23 per cent. But Great Britain and Germany are still far ahead in coal exports, though their coal fields are much smaller than ours. British exports of coal are \$175,000,000 a year and those of Germany \$104,000,000. The United States has reached third place in the exportation of coal, yet its coal production is much the largest, and it has 194,000 square miles of coal fields, compared with the 9,000 of Great Britain, 2,600 of Germany and 1,800 of France. Russia, with its vast territory, possesses less than one-sixth of the natural coal resources of this country.

It is foreseen that the Panama zone is to become a great distributing point of coal to foreign customers. In the connection the improvement of American waterways is of special importance. If the Mississippi and some of its leading tributaries had permanent deep channels, coal could reach far into the interior and get cargoes of coal with the aid of modern loading facilities and with systematic economy insured in every detail. The vast coal deposits of Illinois and Missouri are within easy reach of the main rivers of the continent, and only sufficient water at all seasons is needed to develop heavy cargoes of coal from this region. What Great Britain and Germany are doing with smaller opportunity points the way to what will be done in American coal exportation, which is shown by the latest official figures to be growing fast, though the existing methods of transportation in this respect are crude and expensive.—St. Louis Globe Democrat.

NATIONAL ANTHEMS.

Both the Chinese and Japanese national anthems have the merit of brevity. The length of most national anthems is in inverse ratio to the size of their proprietary countries. The Belgian "Brahmoune" is much longer than the "Marseillaise" and longer than the "God Save the King." While there are only sixteen bars in the Russian anthem and twenty-eight in "Hail Columbia," the Siamese require seventy-six bars to proclaim their loyalty, and the record for length is held by the San Marino anthem, which has by the San Marino anthem, which has many bars as there are square miles in the republic.

A PESSIMIST.

The "duffer" at golf becomes so used to finding himself in all kinds of out-of-the-way places that he hits every ball in the confident expectation of setting into difficulties with it. Such a player was he who speaks thus in the St. Louis Post-Dispatch:

"Is this your ball over here?"

"It is in a hole?"

"Yes."

"A deep hole?"

"Yes."

"With slightly overhanging banks so you can't possibly get at it?"

"Yes."

"Then it's my ball, all right."

DEATHS AND FUNERALS

HULMSTON—The funeral of Thomas Hulmston will be held this afternoon with services at the Second ward meeting house at 2 o'clock. Interment in the city cemetery.

HE WANTED TO GO HOME.

A man who takes his vacation in northern Michigan every summer brought back to Cleveland the other day, says the Plain Dealer, a man servant who had never been in a city before. The sights and scenes along Euclid avenue impressed him peculiarly. Recently he went to his employer and said:

"Mr. Ebegardt, I guess I'll have to go back home."

"Why, Jim, haven't we treated you well here?"

"Yep, treatment all right. But I'm scared about my health."

"Are you sick, Jim?"

"Nope. But I seen four funerals goin' past the house today, and I guess that Cleveland ain't a healthy town!"

THERE IS A DIFFERENCE

Between Promises and Actual Results.

Promises won't overcome hair trouble. The manufacturers of Newbro's Herpicide promise nothing which is not justified by an intelligent use of this preparation. The desired end ultimately becomes an accomplished fact. This is the reason that Herpicide has thousands of satisfied friends all over the world.

By keeping the scalp clean and healthy and destroying the dandruff germ, Newbro's Herpicide makes beautiful hair. Herpicide prevents the hair from falling out and allows it to grow unimpeded and naturally except in cases of chronic baldness, which is incurable.

One dollar size bottles are guaranteed by all druggists to do these things. Send 10c in postage for sample and book to The Herpicide Co., Dept. R, Detroit, Mich.

Applications obtained at the best barber shops.
